

Ideate

- Create a login prompt for administration
- username and password
- All admin username would be identified by "AD" and last 4 of Social; create Pw of own
- Employees will be identified by 1st letter of first name and the first 3 letters of last name
Ex: DTur and Dan created password of choice
- Admin would have access to an "Delete" button on books on their login screen
- There will be a search option to find books and it's quantity and availability
- Books will have full description of condition, year, author, category, and etc. Price
- There will be a tracking system to identify which employee made ~~made~~, additions, and updates. Edits will show employee ID and dates of edit
- Employees and admin will be able to see the inventory of the other stores. (stores will be numbered)
Ex. Rare Book Store 11
- Inventory across all stores will be linked in the store search feature
- Each store will have a contact number for any questions
